

The Filobox cable joint kit is suitable for sealing underground cable connections. The Filobox T40 + Filogel contains a non-hazardous 2K polybutadiene resin. The Filogel resin cures to a soft and non-sticky sealing gel which creates a durable seal around the cable connection. Filogel provides easy re-enterability.

Suitable for connecting LV electrical cables, telephone cables and more. Filobox cable joints are especially suitable for outdoor- and underground applications or in a humid environment where and IP68 sealing is required. Filogel is isocyanate (MDi) free with no safety related labelling.
